FCC Certification

THIS DEVICE COMPLIES WITH PART 15 OF THE FCC RULES. OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITIONS : (1) THIS DEVICES MAY NOT CAUSE HARMFUL INTERFERENCE, AND (2) THIS DEVICE MUST ACCEPT ANY INTERFERENCE, RECEIVED, INCLUDING INTERFERENCE THAT MAY CAUSE UNDESIRED OPERATION.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not Installed and used in accordance with the instructions, may cause harmful interference to radio ommunications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which an be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.
NOTE: THE MANUFACTURER IS NOT RESPONSIBLE FOR ANY RADIO OR TV INTERFERENCE CAUSED BY UNAUTHORIZED MODIFICATIONS TO THIS EQUIPMENT. SUCH MODIFICATIONS COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.

Table of Contents

1. Function summary

● **Digital Audio formats**
MP1, MP2, MP3, WMA, WMV, ASF, WAV (Easy to work with Windows Media Player).

● **Firmware upgrades (Check periodically)**
www.macvision.com will provide the latest software upgrades and functions.

● **Function of free-drive U disk**
Manipulate files via the "mobile disk" in "My PC" without any additional programs on your PC(drive program needs to be installed for operating systems prior to WIN2000).

● **"Dream-space" disk mode**
Enables you to separate the storage disk via the "mobile disk" in "My PC" into two disks using the utilities included on the accompanying CD and encrypt one of those disks to hide the disk space. This encrypted space can then not be read by others.

● **Record/Replay**
Record your voice with the microphone and save as WAV or ACT. You can then choose to replay that all such recordings or to replay selected recordings.

● **Seven tone equalizer**
Can be set to Natural, rock, pop, classical, soft, jazz or heavy bass.

● **various play modes**
Can be set to Natural, cycle single song, play directories, cycle directories, cycle all, shuffle or browse.

● **Shutdown timer**
Sleep mode and power-save mode to simplify and extend battery use.

● **Full-cartoon menu**
Graphic menus with corresponding text display.

● USB connection
Quick connection to USB port.

● Built-in FM radio
You may easily listen to FM stations and set your favourite stations by using Auto Preset or Manual Preset. The player can save 40(20 for each Band) local stations at different frequency.
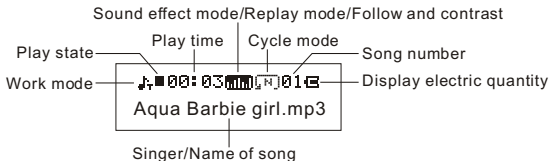

2. Announcement
Thanks for purchasing our MP3 player. Before using the unit please read this manual carefully to obtain the best possible performance from your player and keep it for future reference.

Press Mode to enter interface, Dial to choose:

◇ "Manual mode" denotes that you set a pause manually;

◇ "AUTO mode" denotes that it can pause automatically in replay.

▶ Adjust Contrast

See "Backlight time", operations are the same.

▶ Online Mode

Operating systems earlier than Windows 2000 Service Pack 4 cannot support two partitions. To display chosen disk after connected to PC, You need to choose which disk you want to use between "single normal disk" and "single cryptographic disk" after use the function of "dream space".

▶ Memory Info

The number denotes capacity of disk, percentage denotes the space used.

▶ Firmware Version

For view the current edition of firmware of player.

▶ Firmware Upgrade

Enter this interface to upgrading your firmware.

▽ **Advanced Tip:** Exit menus rapidly by pressing Play after setting options. This function works on any menu.

12. Use USB disk

This player has a standard USB function, supports Windows98 (a driver needs to be installed), Windows 2000 and newer (drivers need not to be installed), MacOS X 10.3 or Linux Red Hat 8.0 or newer.

This player can be supplied power via USB, and can be played without batteries. From the main menu, choose the work mode you want and enter it. (To enter the main menu from Standby, press Mode.)

To connect with PC, plug into USB connector. The player has three display modes:

(1). Standby State

```
USB
Music Disk
```

(2). Downloading state

```
USB Busy...
Music Disk
```

(3). Uploading Mode

```
USB Busy...
Music Disk
```
● New folder

This machine supports up to ninety-nine one-level folders created by the user.

13. Upgrade player

Upgrade this player or service the system firmware with the utility installed on the PC.

1). Enter main menu.	2). Dial Next to choose "system setup".
Music	System
3). Press Mode to enter "system setup".	4). Dial Next to choose "firmware upgrade".
Record Time	Firmware upgrade
5). Press Mode to enter "firmware upgrade". F/W UPGRAD	6). Connect player to PC.

7). Run the upgrade tool "MP3 Player Update" on the computer, click the button called "Choose new edition of firmware file".

8). Choose new firmware from the CD, or download form the homepage of the factory.

9). Click the "begin upgrade" button to start the upgrade.

10). Upgrade should be complete, follow prompts displayed on player:

```
  USB
☺ Success!
```

- Upgrades for firmware are for improvement and optimization of the performance of the player. It could impact normal operation if you fail to upgrade firmware.

- Upgrading the firmware could cause the player to function incorrectly if not done properly. Please read the instructions before you begin. This operation is meant for people who have some computer experience.

- Upgrade software for the player is not suited for other series of players.

14. Miscellaneous settings

● Choose different directories (stop submenu)

In order to play and manage sorted files, users can put files into directories (directories need to be created beforehand). This player supports ninety-nine one-level subdirectories.

1). Directories can be made under record, stop and play modes. ♪ ▪ ▪ 🔋 ▪ ▪ Aqua Barbie girl.mp3	2). Press Mode to enter "Stop submenu". Local folder
3). Press Mode again to enter choose directories interface. 📁 ROOT	4). Dial Next or Last to choose directories. To select a chosen directory press Mode. 📁 M2M

Attention: Directories within a mode are independent of the other modes' directories. They may be given the same name and same settings as directories in other modes, but they will not intersect or otherwise correspond.
● Play mode (play submenu)

You can choose different play modes while playing music or record files.

⟦N⟧ Normal	Play all the music in normal mode
⟦1⟧ Repeat One	Repeat to play one single music file
⟦A⟧ Repeat All	Repeat to play all music in current folder
⟦D⟧ Play Directory	Play all the music in current folder
⟦F⟧ Repeat Folder	Play the music in all folders
⟦R⟧ Play Random	Play the music in current folder at random
⟦I⟧ Browse and play, Intro	Play ten seconds of songs in the current folder

● Play speed (Play submenu)

You can choose different play speeds for MP3 files and record files.

1). Playing music. `00:03 mp01` Aqua Barbie girl.mp3	2). Press Mode to enter submenu. Repeat
3). Dial Next to choose "Tempo rate". Tempo rate	4). Press Mode to enter "Tempo rate" menu. ⟨⟨0⟩⟩
5). Dial Next to speed up, Last to slow.	
⍦ Attention:

The speed setting will apply to all songs until changed.

● Replay mode (Play submenu)
Enter by pressing "REC/A-B" directly or from submenu.

▶ A-B replay

1). Play music or record. ♪▶00:03⏰📁01🔋 Aqua Barbie girl.mp3	2). Press Mode to enter play submenu. 🔁 Repeat
3). Dial Next to choose "Replay mode". 🔁 Repeat	4). Press Mode to enter "Replay mode": ♪▶01:01A-B📁03🔋 say you say me.mp3
5). Dial Next to confirm starting point A. ♪▶01:01A-B📁03🔋 say you say me.mp3	6). Dial Next to confirm starting point B. Repeat play between A-B, exit Reread after setting times; Set point A again (see "Replay times" below for play time)

⍦ Under Replay mode, set "Tempo rate" directly by pressing VOL+ or VOL-.

▶ Follow-read (play mode not have this function)

1). Replaying between A-B. ♪▶01:01A-B📁03🔋 say you say me.mp3	2). Dial Next to enter Follow-read mode. ♪▶00:03⏰📁01🔋 Aqua Barbie girl.mp3

| 3). It begins to record the voice of user when Replay icon A-B changes to follow-read icon ▣, length is the same as the time of the A-B replay. | 4). Play original voice if the time ends and the icon changes to ▣, dial next to enter this function at this time. |

▽ Return to "A-B replay" by dialing Last under this mode.

▶ Contrast function (play mode not have this function)

1). The reread icon displays as ▣ , after entering this function. It plays original sound.	2). Icon changes to ▣ after playing original sound. Now it plays the follow- read sound of user.
3). Plays original sound again after playing follow-read sound of user, repeats until Mode is pressed to exit.	

▽ Dial Last to go back to "Follow-read function".

● Replay times (Play submenu)
The replay times determines how many times it should replay A-B before exiting.

● Replay separation (Play submenu)
Replay separation determines the number of seconds between plays.

15. Important recommendation

▽ Function of "Dream space"

In the past, MP3 users who wanted others to see his individual data could only delete their privacy settings while friends borrowed his MP3.

Now, the function of "dream space" solves that problem.

Using the included utilities, users can separate the disk into two partitions with optional proportions. Two drives will show up on the computer (Windows 2K needs SP4, or you will find one disk only). Choose "single normal disk" or "single encrypted disk" under "system setup/online mode" and encrypt one of the disks to hide the content. This data can not be viewed without a password. This is "dream space".

1). Connect player to PC;

2). Run the MP3 player disk tools;

3). Format first, choose the "encrypt subarea" option, choose appropriate content;

4). Input username at "new username", input password at "new password", input the same password at "confirm password", click "start" to begin the partitioning;

5). Finish the partition and follow the prompts;

6). PC will ask to restart, press "Yes";

7). You will find two disks after rebooting (Win 2K SP3 and earlier will find one);

8). There are three files in the encrypted, two hidden files and an executable file;

9). Run "RdiskDecrypt.exe", input username and password in dialogue box;

10). You must input user name and password every time you connect it with a PC.

⚡ **Attention:** Data in disk will be erased if you separate the disk into two sections, please back up the data on the disk beforehand. Uniting two disks into one disk will also clean out the data.

⚡ **Warning:** Do not lose your username and password. You can only erase the encrypted disk by uniting partitions, which will erase the files.

16. Definition

WMA

Short for Windows Media Audio, WMA is Microsoft's digital music format. WMA is probably the most widely used format, universally supported by almost every online music service and digital music player (except Apple).
WMA comes in both a copy-protected and non-protected version.

MP3

Short for Moving Pictures Experts Group-1, Layer 3, MP3 is still used as general terminology for any type of digital music file. In reality, MP3 is not the default format for most online stores and digital music players. Most online stores automatically convert MP3 files to their default format (WMA or AAC) before transferring the files to a digital music player.

17. Troubleshooting

No power	☆ Check if the batteries are installed correctly; ☆ Check if the USB connection is solid; ☆ Check if the player has been started.
No sound in earphones	☆ Check if the volume is turned down; ☆ Check for a problem with the connection of earphones; ☆ Ensure the cleanliness of the earphones; ☆ Damaged MP3s can play differently, or not at all.
Unusual situation with the word displayed on screen	☆ Check whether you have chosen the right language.
Reception of FM is bad	☆ Adjust the positions of earphone and player. ☆ Shut down nearby electronics to reduce interference. ☆ Use earphone as antenna.
Can not download music normally	☆ Check if the USB line is broken or connected solidly; ☆ Check if the correct driver is installed; ☆ Check if the drive is full or damaged.
Can not played the Music files	☆ Check the digital format. This player does not support DRM files.

Note:

"DRM" Stands for "Digital Rights Management". DRM refers to a collection of systems used to protect the copyrights of electronic media. These include digital music and movies, as well as other data that is stored and transferred digitally. For example, the Apple iTunes Music Store uses a DRM system to limit the number of computers that songs can be played on. Each audio file downloaded from the iTunes music store includes information about the owner of the file and how many times the file has been transferred. The protected files will not play on computers that have not been authorized to play the music.
